

**BARRACHINA'S**

## **TECHNICAL INFORMATION**

### **1. CLEANERS**

#### **1.2 CLEANERS IN SOLVENT BASE**

##### **1.2.4 LAVADOR CHAROL CM**

**CHARACTERISTICS:** It is an organic not watery cleaner, with transparent liquid aspect. It is composed of aliphatic solvents and derivatives of benzene, selected to clean, but also bring the patent leather its characteristic brightness and avoid getting easily misty.

**APPLICATION FIELD:** All kind of Patent leathers. The same with tanned or synthetic ones. Good results can also be obtained on leathers with high brightness, and with a water tanning.

**INSTRUCTIONS FOR USE:** The use of this cleaner has a special feature: once the patent leather has been rubbed with a rag humidified with Patent Leather Cleaner, the following step to complete cleaning is to rub the leather with a dried up and clean rag, until leaving the shoe ready to be packed. Another solution is brushing the shoe with a wool or cotton brush rolling between 500 and 800 rpm. It is advisable not only to use tight-fitting gloves to deal with the product, but also have a good ventilation in the work place designed for its use. You must be as strict as possible in its use, as it is a product in solvent base and consequently volatile.

**SECURITY:** Look up the general security.

*Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.*
