

BARRACHINA'S

TECHNICAL INFORMATION

1. CLEANERS

1.1 CLEANERS IN WATERY BASE

1.1.4 GEL LAVADOR A

CHARACTERISTICS: It is composed of a mixture of surfactants conveniently selected to get a good degreasing and dirt cleaning power. Its aspect is of a transparent gel. It acts over usual dirt of manufacturing (sweat, dust, machine grease, glues, and so on).

APPLICATION FIELD: Full grain, corrected and plastified Split leathers. Of course we will not use it for fashion finishes such as oil-tanned, pull-up, etc...

INSTRUCTIONS FOR USE: Some very simple details have to be noticed as they will help us to make a good cleaning. It is better to use an appropriate rag than a sponge, for the dirt dissolved by the cleaner will be more easily dragged. It is convenient to change frequently from a dirty to a clean rag, because it is an usual mistake to use the same rag during too long, and be dirtying instead of cleaning. It is convenient and advisable to use tight-fitting gloves to avoid the continued contact with the skin.

SECURITY: Look up the general security section.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
