

BARRACHINA'S

TECHNICAL INFORMATION

10. ECO-CREAMS

10.1 SELF-BRIGHTENING ECO-CREAMS

10.1.2 ECO-CREMANTIQUE LIQ.

CHARACTERISTICS:

Mixture of acrylic polymers, waxes and leveling and touch additives in a aqueous medium, it has a yellow-white creamy liquid aspect with a characteristic waxes smell. It gives a very natural **high power gloss**.

APPLICATION FIELD:

It gives good results in every kind of leather, but especially when a good gloss and filling power is needed. It gives spectacular results on **rectified** leather, especially on **Antique Finish** leather.

INSTRUCTIONS FOR USE:

After thoroughly cleaning leather from glues and other dirt, and after repairing and leveling colours if necessary, you will apply colourless or coloured ECO-CREMANTIQUE LIQ. with a spraying gun with a nozzle opening of 1-1,5 mm. at 4-6 atm. When it is dry, after 3 to 5 minutes approximately, you will brush the shoe with a horsehair brush, and a cotton or wool brush afterwards, at 500 to 800 r.p.m. This last brush can be impregnated with our BRIGHTENING WAX or SUPERWAX.

It is convenient and advisable the colourless or coloured ECO-CREMANTIQUE LIQ. to be applied in good ventilation and hand protection conditions to avoid any allergic reaction or irritation, in spite of being an environment-friendly cream

SECURITY:

Look up the general security section.

REMARKS:

Our zone laboratories can give ECO-CREMANTIQUE LIQ. any **environment-friendly aniline** colour if needed, to enhance or level the shoe general tone.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
