

## TECHNICAL INFORMATION

### 10. ECO-CREAMS

#### 10.2 TO-BE-POLISHED ECO-CREAMS

##### 10.2.12 ECO-CREMALUX MATE

###### **CHARACTERISTICS:**

Emulsion of natural and synthetic waxes in an aqueous medium and matting agents, properly formulated with silicone oils to give the leather a soft and warm touch. Its aspect is of a white cream.

###### **APPLICATION FIELD:**

Full-grain and Corrected leathers when a natural "bootblack"-like aspect, low brightness and soft touch is needed. It is logical to think that the quantity of product to apply to get the desired effect.

###### **INSTRUCIONS FOR USE:**

After thoroughly cleaning leather from glues and other dirt, and after repairing and leveling colours if necessary, you will apply colourless or coloured ECO-CREMALUX MATE with a proper sponge. You will try to reach every corner, back-stitch, and punch to fill, give colour and vigour to leather and place waxes as uniformly as possible. You will wait for a minimum of 4 to 6 minutes, depending on room temperature and humidity, and then brush the shoe with a horsehair brush at 500 to 800 rpm., trying to spread waxes properly. You will finally use a cotton or wool brush impregnated with Brightening Wax at 500 to 800 rpm. to get the desired touch and effect. It is convenient and advisable this cream to be applied in good ventilation and hand protection conditions to avoid any allergic reaction or irritation.

###### **SECURITY:**

Look up the general security section.

###### **REMARKS:**

Our zone laboratories will supply you with any coloured Eco-Cremalux. You can make "Antique" effect with these creams properly coloured.
