

TECHNICAL INFORMATION

10. ECO-CREAMS

10.2 TO-BE-POLISHED ECO-CREAMS

10.2.18. ECO-CREMA VL-P

CHARACTERISTICS:

Mixture of acrylic polymers and natural oils in an aqueous medium. A natural shine and great penetrating power are obtained, coverage and blending with excellent power to camouflage defects. It presents resistance to water drops and color migration, increasing the burnt effect.

APPLICATION FIELD:

CRUST leathers that you wish to finish on the last itself and thus present a shoe customized to the taste of the manufacturer. It should be kept in mind that the leather must be as bare as possible so that the cream is absorbed as easily as possible and thus achieve the desired finish.

INSTRUCCIONES FOR USE:

Apply with a suitable sponge of great resistance, high density, with very small and soft cells the ECO-CREMA VL-P COLORED, trying to reach all the corners, it is preferable to apply the cream on a shoe last to be able to access the entire surface of the leather. Let dry for at least 4-6 minutes, depending on the ambient temperature and humidity, and then brush with a hair-bristle brush at approximately 500/800 rpm, trying to distribute the waxes evenly. Apply a final top coat and finally brush with a Cotton or Wool brush impregnated with Polishing Wax at approximately 500/800 r.p.m. to achieve the desired Shine and Feel. The application of this ECO-CREMA VL-P is convenient and recommended in good ventilation conditions and with hand protection to avoid contact with the skin, thus preventing any allergic reaction.

SECURITY:

Look up the general security section.

REMARKS:

Our zone laboratories will supply you with any coloured ECO-CREMA VL-P.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
