

BARRACHINA'S

TECHNICAL INFORMATION

10. ECO-CREAMS

10.2 TO-BE-POLISHED ECO-CREAMS

10.2.7. ECO-CREMA VL

CHARACTERISTICS:

Mixture of acrylic polymers and natural oils in an aqueous medium. A natural shine and excellent penetration are achieved. It is resistant to water droplets and color migration.

APPLICATION FIELD:

CRUST leathers that you want to finish on the last itself and thus present a shoe customized to the manufacturer's taste. Keep in mind that the leather should be as bare as possible so that the cream can be absorbed as easily as possible and thus achieve the desired finish.

INSTRUCTIONS OF USE:

Apply the VL COLORED ECO-CREAM with a suitable sponge of great resistance, high density, with very small and soft cells. trying to reach all corners, it is preferable to apply the cream on a last to be able to access the entire surface of the leather. Let it dry for at least 4-6 minutes, depending on the ambient temperature and humidity, Then brush with a horsehair brush at approximately 500/800 rpm, trying to distribute the wax evenly. Apply a top coat and finally brush with a cotton or wool brush soaked in polishing wax at approximately 500-800 rpm to achieve the desired shine and feel.. It is advisable and recommended to apply this ECO-CREAM VL in good ventilation and protection conditions on the hands to avoid contact with the skin, thus avoiding any allergic reaction.

Remarks:

Our area labs can produce colored ECO-CREAMA VL in any aniline tone if the finish requires it, either to enhance or level the general tone of the shoe.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
