

TECHNICAL INFORMATION

10. ECO-CREAMS

10.2 TO-BE-POLISHED ECO-CREAMS

10.2.9 ECO-CREMA UNIVERSAL 2000

CHARACTERISTICS:

Mixture of waxes and polymers in an aqueous medium with a creamy appearance, which applied to the shoe gives it a high, crystalline shine and a sliding touch.

APPLICATION FIELD:

Polishable cream, suitable for application on full grain or rectified items where you want to achieve a high and crystalline shine.

INSTRUCTIONS OF USE:

After thoroughly cleaning glues and other dirt, apply the ECO-CREMA UNIVERSAL 2000. It is advisable to use suitable sponges of great resistance, high density, with very small and soft cells estimated for such a case, trying to distribute the product as evenly as possible. Once dry, approximately 5-6 minutes, it should be polished with a cloth brush and then with a cotton or wool brush at approximately 500/800 rpm.

SECURITY:

Look up the general security section.

REMARKS:

Our area labs can produce colored ECO-CREMA UNIVERSAL 2000 in any aniline tone if the finish requires it, either to enhance or level the general tone of the shoe.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
