

**BARRACHINA'S**

## **TECHNICAL INFORMATION**

### **12. LEATHER FINISHING-LEVELERS**

#### **12.50 FONDO CRUST 201 N LIQ.**

**CHARACTERISTICS:** Compound product, formed by special waxes and fillers duly formulated, for use as a full grain and corrected flower bottom. Due to its characteristics with the addition of dyes, it has an appreciable power of coverage over leather, with a natural and white appearance. The defects are disguised, and both brightness and touch, are very natural

**APPLICATION FIELD:** Due to its adhesion and flexibility characteristics it gives the leather a natural look and a pleasant touch without hardening it.

**INSTRUCTIONS FOR USE:** Apply on crust leather, full grain or rectified flower, with or without previous impregnation. Iron at 80°C, 80 atm pressure.

**SECURITY:** Look up the general security section.

**REMARKS:** Our zone laboratories will supply you with any coloured FONDO CRUST 201 N LIQ.

*Barrachinas can not control the conditions of use of its products, for this reason it can not accept responsibilities regarding the results and / or consequences that may derive from its use.*
