

BARRACHINA'S

TECHNICAL INFORMATION

4. GLOSSES

4.1 GLOSSES IN A SOLVENT BASE

4.1.8 SOLVENT COLOURS BASE

BASE ORO N° 5
BASE PLATA N°2

CHARACTERISTICS:

From a glossy solvent base we are able to solve any repairing problem which might appear in the TRANSFER or METALLIC finishes.

INSTRUCTIONS FOR USE:

After thoroughly cleaning glues and other kinds of dirt, and after colour repairing and levelling if necessary, apply "SOLVENT COLOURS BASE" on LUXSOL or SOLVENT REPAIR and apply with the spray gun with an opening of 1-1,5 mm. at a pressure of 2-4 atm. and the right distance to the shoe. Practice tells us that 25-35 cm. is a proper distance.

It is important to have a good application cabin, equipped with a proper extractor, curtain of water and the adequate light for the right application. It is convenient to wear a protecting mask.

SECURITY:

Check the safety data sheet.

OBSERVATIONS:

In our zone laboratories every colour and brightness, is prepared, so you will have fast solutions to production problems.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
