

**BARRACHINA'S**

## TECHNICAL INFORMATION

### 4. GLOSSES

#### 4.2 GLOSSES IN WATERY BASE

##### 4.2.15 ECO-LUSTRAFIX UNIVERSAL

#### **CHARACTERISTICS:**

Mixture of acrylic polymers, waxes and urethanes, properly formulated to get a high power gloss, with a very natural and nice touch. Its aspect is of a grey liquid with a nice smell.

#### **APPLICATION FIELD:**

It is a great product for full-grain leather, where you want to enhance the leather quality.

#### **INSTRUCTIONS FOR USE:**

After thoroughly cleaning leather from glues and other dirt, and after repairing and leveling colours if necessary, you will apply ECO-LUSTRAFIX UNIVERSAL COLOURLESS with a spraying gun with a nozzle opening of 1-1,5 mm. at 4-6 atm. of pressure, and a proper distance to the shoe. The experience tells us the correct distance is from 25 to 35 cm.. These glosses have a good advantage: they improve their effects with a good brushing, using a cotton or wool brush impregnated with our BRIGHTENING WAX at 500 to 800 r.p.m. It is important to have a good application cabin, equipped with an extractor fan, water screen and good light. It is convenient to use a protecting mask.

#### **SECURITY:**

Look up the general security section.

#### **REMARKS:**

Our zone laboratories can give ECO-LUSTRAFIX UNIVERSAL COLOURLESS any **environment-friendly aniline** colour if needed, to enhance or level the shoe general tone.
