

BARRACHINA'S

## TECHNICAL INFORMATION

### 4. GLOSSES

#### 4.2 GLOSSES IN WATERY BASE

##### 4.2.7 ECO-LUSTRAFIX N-1430

**CHARACTERISTICS:** Mixture of waxes emulsioned and properly formulated to get a **medium power gloss**, with a natural and nice touch, reminding of **dressmaking Nappa**.

**APPLICATION FIELD:** It is applied on aniline average and high / medium quality leathers.

**INSTRUCTIONS FOR USE:** After thoroughly cleaning leather from glues and other dirts, and after repairing and leveling colours if necessary, you will apply Eco-Lustrafix N-1430 with a spraying gun with a nozzle opening of 1-1,5 mm. at 4-6 atm. of pressure, and a proper distance to the shoe. The experience tells us the correct distance is from 25 to 35 cm.. These glosses have a good advantage: they improve their effects with a good brushing, using a cotton or wool brush impregnated with our BRIGHTENING WAX at 500 to 800 r.p.m.

It is important to have a good application cabin, equipped with an extractor fan, water screen and good light. It is convenient to use a protecting mask.

**SECURITY:** Look up the general security section.

**REMARKS:** Our zone laboratories can give ECO-LUSTRAFIX any **environment-friendly aniline** colour if needed, to enhance or level the shoe general tone.
