

BARRACHINA'S

TECHNICAL INFORMATION

5. CREAMS

5.1 SELF-BRIGHTENING CREAMS

5.1.5 CREMANTIQUE LIQ.

CHARACTERISTICS:

Mixture of acrylic polymers, waxes and leveling and touch additives in aqueous-alcoholic medium. Its has a yellow-white liquid aspect with a characteristic alcohol smell. It gives a very natural **high power gloss**.

APPLICATION FIELD:

It gives good results in every kind of leather, but especially when gloss and filling power is needed. It gives spectacular reults on **plastified** leather, especially on **Antique Finish** leather.

INSTRUCTIONS FOR USE:

After thoroughly cleaning leather from glues and other dirt, and after repairing and leveling colours if necessary, you will apply Cremantique Liquid with a spraying gun with a nozzle opening of 1-1,5 mm. at 4-6 atm. of pressure, and a proper distance to the shoe. The experience tells us the correct distance is from 25 to 35 cm.. This cream have a good advantage: they improve their effects with a good brushing, using a cotton or wool brush impregnated with our BRIGHTENING WAX at 500 to 800 r.p.m. It is important to have a good application cabin, equipped with an extractor fan, water screen and good light. It is convenient to use a protecting mask.

SECURITY:

Look up the general security section.

REMARKS:

Our zone laboratories will give Cremantique Liquid any aniline colour if needed, to emphasize a tone or level shoe general colour.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
