

BARRACHINA'S

TECHNICAL INFORMATION

5. CREAMS

5.1 SELF-BRIGHENING CREAMS

5.1.8 FONDO CRUST

CHARACTERISTICS:

Mixture of acrylic polymers, waxes and leveling and touch additives in a aqueous-alcoholic medium. Its aspect is creamy white-yellow and applied to the shoe it gives a **medium-high power gloss, a spectacular filling**, and a quite natural touch. It presents a characteristic **thixotropy** and that's why its presentation aspect is a creamy one, but when shaken or stirred it goes into a liquid very easy to spread on the shoe. Therefore you can avoid getting lines when giving gloss to very covered or plastified leathers, like Antique finish leathers.

APPLICATION FIELD:

It gives good results in every kind of leather, but especially when a good gloss and filling power is needed.

INSTRUCTIONS FOR USE:

After thoroughly cleaning leather from glues and other dirt, and after repairing and leveling colours if necessary, you will apply colourless or coloured FONDO CRUST with a sponge. It is advisable to use proper sponges with great resistance, high density, very soft and small cells, able to spread product as uniformly as possible. When it is dry, after 3 to 5 minutes approximately, you will brush the shoe with a horsehair brush, and a cotton or wool brush afterwards, at 500 to 800 r.p.m. This last brush can be impregnated with our BRIGHTENING WAX. It is convenient and advisable the colourless or coloured FONDO CRUST to be applied in good ventilation and hand protection conditions to avoid any allergic reaction or irritation.

SECURITY:

Look up the general security section.

REMARKS:

Our zone laboratories can give BOX BL-2000 CREAM any aniline colour if needed, to enhance or level the shoe general tone.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
