

TECHNICAL INFORMATION

6. SOLID WAXES

6.3 CERA ABRILLANTADORA

CHARACTERISTICS:

Mixture of hard waxes properly formulated to get a **Cristaline Gloss** effect on shoes already finished with watery glosses or creams. It is presented shaped as solid white-coloured rectangular bars, properly sized to be easily handled. It is also manufactured in different colours, especially black or brown.

APPLICATION FIELD:

In every kind of leather, Box-Calf, Kid-skin, Buffalo, Full-Grain or Corrected leather, to enhance the gloss previously applied. Also applied on leather and heels to get bright, soft, limpid surfaces.

INSTRUCTIONS FOR USE:

The application is by friction of the wax bar to a cotton or wool brush put together to a mechanical roller whose speed is 500 to 800 rpm. approx. Once the brush is impregnated, you will approach the leather to be polished trying to get a uniform friction and the desired polishing effect. The roller machine must have a good dust extractor to avoid any damage for the worker who is polishing shoes. It is also convenient for the whole polishing operation to use protecting mask and proper glasses.

SECURITY:

Look up the general security section.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
