TECHNICAL INFORMATION

7. SPECIAL PRODUCTS

7.25 ECO-GRASSANT F-29

CHARACTERISTICS: Mixture of oils, waxes and touch additives properly formulated in a watery medium. Its aspect is of a milky white liquid. It brings vigour and darkness to the Suede-like and Nubuk leathers, but it greases them at the same time.

APPLICATION FIELD: For every leather presented in the shoe market as **GREASED**, the same with Full-Grain, Corrected or Suede-like Split leathers.

INSTRUCTIONS FOR USE: After thoroughly cleaning leather from glues and other dirts (with our NUBUK CLEANER RUBBER) you will apply Eco-Grassant F-29 INC, depending on your decision made in previous tests. You will apply it with an spraying gun with a nozzle opening of 1 to 1,5 mm. and a pressure of 4 to 6 atm., from a proper distance. Experience tells us that 25 to 35 cm. is the correct distance.

It is important to have an application cabin equipped with a good extractor fan, water screen and good light for the application to be correct. It is convenient to use protecting mask.

SECURITY: Look up the general security section.

REMARKS: Our zone laboratories can offer any ECO-GRASSANT F29 coloured with the desired tone.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
