

**BARRACHINA'S**

## TECHNICAL INFORMATION

### 7. SPECIAL PRODUCTS

#### 7.2 GRASSANT MG-2 GRASSANT K

**CHARACTERISTICS:** Mixture of oils and greasy touch additives properly formulated in a watery medium. Its aspect is of a milky white liquid with a grease smell. It brings vigour and darkness to the Suede-like and Nubuk leathers, but it greases them at the same time. The main differences between MG-2 and K kinds is their different touch.

**APPLICATION FIELD:** For every leather presented in the shoe market as **GREASED**, the same with Full-Grain, Corrected or Suede-like Split leathers.

**INSTRUCTIONS FOR USE:** After thoroughly cleaning leather from glues and other dirts (with our NUBUK CLEANER RUBBER) you will apply Grassant MG-2 or K depending on your decision made in previous tests. You will apply it with an spraying gun with a nozzle opening of 1 to 1,5 mm. and a pressure of 4 to 6 atm., from a proper distance. Experience tells us that 25 to 35 cm. is the correct distance.

It is important to have an application cabin equipped with a good extractor fan, water screen and good light for the application to be correct. It is convenient to use protecting mask.

**SECURITY:** Look up the general security section.

**REMARKS:** Our zone laboratories can offer any GRASSANT coloured with the desired tone.
