

BARRACHINA'S

TECHNICAL INFORMATION

7. SPECIAL PRODUCTS

7.2 GRASSANT MG-2

CHARACTERISTICS:

Mixture of oils and greasy touch additives properly formulated in a watery medium. Its aspect is of a milky white liquid with a grease smell. It brings vigour and darkness to the Suede-like and Nubuk leathers, but it greases them at the same time. The main differences between MG-2 kinds is their different touch.

APPLICATION FIELD:

For every leather presented in the shoe market as **GREASED**, the same with Full-Grain, Corrected or Suede-like Split leathers.

INSTRUCTIONS FOR USE:

After thoroughly cleaning leather from glues and other dirt (with our NUBUK CLEANER RUBBER) you will apply Grassant MG-2 depending on your decision made in previous tests. You will apply it with a spraying gun with a nozzle opening of 1 to 1,5 mm. and a pressure of 4 to 6 atm., from a proper distance. Experience tells us that 25 to 35 cm. is the correct distance. It is important to have an application cabin equipped with a good extractor fan, water screen and good light for the application to be correct. It is convenient to use protecting mask.

SECURITY:

Look up the general security section.

REMARKS:

Our zone laboratories can offer any GRASSANT coloured with the desired tone.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
