

BARRACHINA'S

TECHNICAL INFORMATION

7. SPECIAL PRODUCTS

7.4 BASE TALKINA A INC.

CHARACTERISTICS:

Mixture of waxes and acrylic polymers properly formulated to get a high gloss, with a very silky and nice touch. Its aspect is of a milky white liquid.

APPLICATION FIELD:

For the full grain when you want to get an aged effect, to contrast the colour of the leather with the white colour of the product.

INSTRUCTIONS FOR USE:

After thoroughly cleaning leather from glues and other dirt, and after repairing and leveling colours if necessary, you will apply BASE TALKINA A coloured to the tone desired with a spraying gun with a nozzle opening of 1-1,5 mm. at 3-5 atm. of pressure, and a proper distance to the shoe. The experience tells us the correct distance is from 25 to 35 cm. This product, besides to give to the leather a silky touch and a high gloss, gets two-colours very typical with the brush. It is important to have a good application cabin, equipped with an extractor fan, water screen and good light. It is convenient to use a protecting mask.

SECURITY:

Look up the general security section.

REMARKS:

Our zone laboratories will supply you with any coloured BASE TALKINA A.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
