7. SPECIAL PRODUCTS

7.6 CEROXPOL CV

CEROXPOL CV LIQ CEROXPOLCV PASTA

CHARACTERISTICS:

Emulsion of soft natural and synthetic waxes in a solvent medium, properly formulated to get a leather with a **waxy-greasy** touch. Its aspect is of a white **liquid** with a White Spirit smell. Gloss is not obtained, for the leather, once the product is applied and dried up, has a **matt and dark aspect** and a greasy touch.

APPLICATION FIELD:

Full-grain and Nubuk leather when you want a fashion dark matt aspect. Also for Pull-up leathers. As you can imagine, the quantity of product to apply to get the desired greasy touch will depend on leather absorption.

INSTRUCTIONS FOR USE:

After thoroughly cleaning leather from glues and other dirt (with our NUBUK CLEANER RUBBER), you will apply CEROXPOL CV with an **spraying gun** with a nozzle opening of 1 to 1,5 mm. and a pressure of 4 to 6 atm., from a proper distance. Experience tells us that 25 to 35 cm. is the correct distance. It is important to have an application cabin equipped with a good extractor fan, water screen and good light for the application to be correct. It is convenient to use protecting mask.

SECURITY:

Look up the general security section.

REMARKS:

Our zone laboratories can offer CEROXPOL CV coloured with the desired tone.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
