TECHNICAL INFORMATION

8. AUXILIARY PRODUCTS

8.17 ABLANDADOR A / A SOFTENER

CHARACTERISTICS: Mixture of surfactants and oils properly formulated in a aqueous-alcoholic medium. Its aspect is of yellow nearly transparent liquid with an alcohol smell. When leather is wet and penetrated with this product, it gets softer and can be handled more easily in operations such as preparing or lasting of mocassins vamps, avoiding leather breaking.

APPLICATION FIELD: In every shoe manufacturing operation when leather hardness makes it difficult to be handled.

INSTRUCTIONS FOR USE: A Softener must be used pure or diluted with water in a 1 to 1 proportion. That's to say, one part of Softener with 1 part of water. In extreme difficulty cases you will look up our Technical Department. You will wet the leather to be handled (sewn, lasted or stretched....) with the C Softener dilution. Then you will wait for 5 minutes for the effect of softening to appear and will begin to handle leather.

It is convenient to apply product in a well ventilated zone and protect your hands with proper work glasses.

SECURITY: Look up the general security section.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
