

TECHNICAL INFORMATION

8. AUXILIARY PRODUCTS

8.2 ANTIESPUMANTE BA-2

CHARACTERISTICS:

Mixture of silicone oils properly formulated in a watery medium. Its aspect is of a milky white liquid.

APPLICATION FIELD:

It is used by its foam breaker power as a defoamer agent in finishing application cabins provided with a water screen.

INSTRUCTIONS FOR USE:

While using an application cabin provided with a water screen, a lot of foam is formed due to spraying gun application of watery glosses made of waxes and acrylic resins that contain important quantities of humidifiers and surfactants. From time to time you will bedew the formed foam with small quantities of Defoamer that will break it in order to go on normally working. It is convenient to apply the product in a well ventilated area and protect your hands with suitable work gloves.

SECURITY:

Look up the security pages.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
