

BARRACHINA'S

TECHNICAL INFORMATION

8. AUXILIARY PRODUCT

8.56 ABLANDADOR A

CHARACTERISTICS:

Mixture of surfactants and oils conveniently formulated in a hydroalcoholic medium. Its appearance is that of a yellowish, almost transparent liquid that smells of alcohol. Due to its composition, it penetrates the leather when wet, softening it enough to be able to easily manipulate the cuts of moccasins during stitching, as well as the cuts for assembly, preventing breakage.

APPLICATION FIELD:

In all operations where the hardness of the leather creates problems for handling.

INSTRUCTIONS FOR USE:

It is used as is or Softener A is diluted with water in a 1:1 ratio, that is, one part of Softener plus 1 part of water. For cases of extreme difficulty with the leather, please consult our Technical Department. Wet the leather to be manipulated (sewn, assembled, stretched, etc.) with the Softener dilution, let it rest for about 5 minutes to achieve the softening effect and then proceed to manipulate the leather. It is advisable to apply the product in a well-ventilated area, protecting your hands with suitable work gloves.

SECURITY:

Look up the general security section.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage
