

BARRACHINA'S

TECHNICAL INFORMATION

8. AUXILIARY PRODUCTS

8.9 ANTISEPTICO REPUSS / ANTISEPTIC REPUSS

CHARACTERISTICS: Mixture of oil, emulsion-maker, and preservative, in a watery media, properly formulated, to treat leather with problems of greasy repuss. It looks like a dark brown liquid.

APPLICATION FIELD: Full grain leather, corrected grain leather and nubucks which have repuss problems, both because of natural greases coming from the leather itself, or because of a bad fixing of added greases during manufacture process. It is also used as a preventive measure in cases in which the type of leather is prone to these kind of problems.

INSTRUCTIONS FOR USE: Carry out a deep cleaning of the leather which has this problem, brushing with a clean rag soaked with Antiseptic Repuss, clearing repuss from surface. Clean often the rag to keep it clean.

SECURITY: Look up the security sheets.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
