

BARRACHINA'S

TECHNICAL INFORMATION

9. SOLES, EDGES AND HEELS FINISHING

9.1 NATURAL TCC

CHARACTERISTICS: Mixture of natural and synthetic waxes properly formulated to get a high filling and brightening power when being applied and polished on a lining heel or a leather edge.

APPLICATION FIELD: Leather edges and heels.

INSTRUCTIONS FOR USE: On a leather edge or heel previously sanded with a roughing sandpaper, you will apply our filler MORDIENTE. After a normal drying up you will sand it again with a number 300 to 400 sandpaper. Afterwards you will apply the ink with a paintbrush. Once the ink is dried up you will polish leather with a leather sheets roller at 800 r.p.m. approx. to melt waxes and fill up leather. You will eventually brighten it with a cotton or wool brush impregnated with our BRIGHTENING WAX.

It is convenient and advisable to apply NATURAL OR COLOURED TCC in good conditions of ventilation and hand protection to avoid skin contact and any allergic reaction or irritation.

SECURITY: Look up the security pages.

REMARKS: Natural TCC Ink is used for natural edges and heels. For any special colour you must ask our zone technicians.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
