

BARRACHINA'S

TECHNICAL INFORMATION

9. SOLES, EDGES AND HEELS FINISHING

9.5 TINTA EVA-PU.

CHARACTERISTICS:

Composed of a mixture of waxes and polymers suitably formulated to achieve excellent anchoring on EVA and PU supports.

APPLICATION FIELD:

All kinds of EVA and PU items.

INSTRUCTIONS FOR USE:

Apply with an air spray gun on the substrate to be painted.

Before applying the ink, halogenate the surface with the HALOGENANTE MK with a cloth, replacing it from time to time so as not to generate an excess of silicones that makes it difficult for the ink to anchor, this operation is crucial because the anchoring of the ink on the substrate will depend on a good halogenated. Then apply Tinta Eva-Pu to achieve an excellent anchorage.

SECURITY:

Look up the security pages.

REMARKS:

Our zone laboratories can give Tintas EVA-PU any desired colour.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
