

BARRACHINA'S

TECHNICAL INFORMATION

9. SOLES, EDGES AND HEELS FINISHING

9.7 MORDIENTE H

CHARACTERISTICS: Mixture of natural shellacs in a solvent medium. Its aspect is of a dark yellow liquid, and with the characteristic solvent smell.

APPLICATION FIELD: For getting high quality finishings in **EDGES** and **HEELS**.

INSTRUCTIONS FOR USE: EDGES and HEELS are sanded with a thick sandpaper (80-140). Afterwards you will apply MORDIENTE with a paintbrush. Once MORDIENTE H is dried up (5-10 minutes), you will sand with a thin sandpaper (240-320). MORDIENTE H makes hard fibre leather to get easier a good sanded, and therefore a nice and glazed surface.

SECURITY: Look up the security pages.

REMARKS: Ours zone laboratoires will supply you with any coloured Mordiente H.

Barrachinas cannot control the conditions under which its products are used, therefore do not accept responsibilities concerning the results and/or consequences from its usage.
